Rapid Wash 220 500

Cleaning agent for rubber blankets, ink rollers and ink ducts
- water miscible and corrosion inhibited -
- with FOGRA Test Certificates for KBA, Heidelberg and manroland printing machines
- in accordance with the quality standards of the BG ETEM Trade Initiative for Cleaning Agents (BG ETEM: German Accident Prevention & Insurance Association for the Energy, Textile, Electronics and Media Industries)

Use:
Cleaning agent based on hydrocarbons without aromatic compounds, suitable for automatic blanket washers and for washing by hand, in sheet fed offset, coldset and heatset.

Rating:
- Density at 20°C (g/cm³): appr. 0.81
- Initial boiling point (°C): appr. 190
- Flash point, DIN 51758/ASTM D 93 (°C): appr. 66
- Appearance: clear as water, colourless to slightly yellowish (depending on raw materials)

Application:
Washing by hand:
Due to the low viscosity and the good solubility, we recommend to comply with the processing instructions given by the trade association.
- Use only minimum quantity of cleaning agent.
- Cleaning agent should be rubbed intensively onto the spots to be cleaned. Cleaning agent evaporates with delay, so that the underground appears moist after application. Wipe over with dry cloth.
- For use of emulsion, e.g. to remove paper dust from blankets, RW 220 500 is diluted 1 : 1 with water.
- When using the special EASY-Scrubbers (cleaning sponges) you will achieve considerable savings of cleaning agent and shop towels.

Automatic blanket washers:
Depending on the washing program, the rapid wash is to be used pure or pre-emulsified. If the product shall be pre-emulsified in the storage tanks, we recommend to stir the contents or mix it by pumping.

Specific characteristics:
The product has a very high cleaning power and does not cause embossing or shrinking of the rubber blankets and rollers. It does not cause corrosion on presensitised printing plates and is low in odour.

Free of aromatic compounds and chlorinated hydrocarbons.

Marking: This rapid wash is not a dangerous product. Transport regulations do not apply.
Disposal: VEGRA Recycling Technique or combustion as special solid waste.

Packing:
PE Cans of 10 and 25 l; Drums of 120 and 210 ltr
Containers of 630 and 1000 ltr or delivered in a lorry

The specifications given in this brochure are based on laboratory tests and practical experience. All specifications are to the best of our knowledge and reflect the latest state of the art, however, this does not imply any liability.

27 June 2018 - cw/lh - Please take note of the VEGRA Recycling Concept for Rapid Wash.
