

VEGRA Quality Management

BESSER DRUCKEN
UND LACKIEREN

VEGRA GmbH has their own Quality Management named:

The VEGRA Quality Management is adjusted to the structure and size of our company as well as to our production processes, is based on the annually-updated Sony Standard SS-00259 and following the DIN EN ISO 9001 standards.

The compliance with the strict quality and environmental requirements contributes effectively to a continuous improvement of our VEGRA Quality Management. In order to achieve the highest possible environmental standard for our products, it is inevitable to have the entire process from the raw material until the dispatch of the product controlled and retraceable. That way, our processes can be optimized continually and process steps which might be harmful to the environment can be avoided as far as possible.

It is our aim to meet the present and future requirements of our customers by offering high-quality products, an innovative environmental policy and first-class service.
